

# 'U' Syphons and 'Ring' Type Syphons

## **Applications:**

Syphons can be used to condense vapour into liquid before it damages the gauge, to cool the gauge when working on a process involving high temperatures and also, they can be used to change the direction of pipework to a gauge ('u' syphon: at a right angle).

## **Specifications**

### **Materials:**

Brass, Mild Steel,  
Stainless Steel

### **Connection:**

3/8"bsp, 1/2"bsp,  
1/4"bsp, 1/2"npt
