

Magnet Mounted Bimetal Thermometers

Application:

A simple bimetal temperature indicator using surface contact transfer of heat to indicate surface temperature of pipe or metal plate.

Often used in restricted space situations where there is insufficient room to install a rigid stem thermometer.

Specification:

Nominal Size 63mm

Accuracy BS EN13190 - Class 2

Scales °C Outer (Black) °F Inner (Red)

Ranges

0/120 °C+F Temperature

0/160 °C+F Temperature

0/250 °C+F Temperature

0/400° C+F Temperature

Ingress Protection IP 40 as per EN 60529

Case & Bezel 304 Stainless Steel

Window Instrument Glass

Temperature Movement Precision

Bimetal Spiral

Pointer Aluminium - Black

Dial Aluminium - White
