

Pockets and Thermowells

Application:

Pockets and thermowells are used on thermometers. They can be used as a barrier to increase the temperature that the thermometer can withstand. Also, they can be used to help the thermometer to be released from the system and to stop any liquid being released when this happens.

Specification

Material:

Stainless Steel, Brass

Size:

50mm, 100mm, 150mm

Connection:

3/8"bsp, 1/2"bspt, 1/2"bsp,
1/2"npt
